Regulations for H194 Honors Undergraduate Research (3 or 4 units)

Course may be repeated for a maximum of 8 units. Variable format. *Prerequisites: Upper division technical GPA 3.3 or higher and consent of instructor and adviser.* Supervised research. Students who have completed 3 or more upper division courses may pursue original research under the direction of one of the members of the staff. May be taken a second time for credit only. A final report or presentation is required. A maximum of 4 units of this course may be used to fulfill the research or technical elective (old curriculum) requirement in the Bioengineering program.

_____ This is the second time I am taking BioE H194. I understand the units will count towards the engineering units but the course can not fulfill any Bioengineering course requirements.

Policy for Non-BioE Students signing up for BioE Research:

Students who are in majors other than Bioengineering may sign up for BioE 99, 199 and 196, but only if they work with (and obtain a signature from) a UC Berkeley Bioengineering faculty. Non-BioE majors are ineligible to receive BioE research credit for working with faculty from other departments at UC Berkeley. They are also ineligible to receive BioE research credit for working with researchers at UCSF or LBNL. Instead, it is suggested that you sign up for research units from your home department.

For office use only:
